About the Conference

The conference on **"Innovation for Impact: Digital and Mobile Technologies for Sustainable Business Management, Teaching & Learning, Environmental Protection, Healthcare, Tourism, and Engineering Applications"** aims to bring together researchers, industry professionals, educators, and policymakers to explore the transformative role of digital and mobile technologies in addressing global challenges.

As societies and industries strive for sustainability, innovation in technology plays a pivotal role in driving positive change across diverse sectors. This multidisciplinary conference provides a collaborative platform to share research, case studies, and practical solutions that harness the power of innovation to create lasting social, economic, and environmental impact. Participants will engage in critical discussions, exchange ideas, and build partnerships to advance sustainable practices through technology-enabled solutions.

Key Themes

The following indicative topics, but not limited to, are welcome to be submitted for the conference:

1. Digital Innovation, Intelligent Systems & Sustainable Engineering

This track focuses on how strong foundations of physical sciences enable digital transformation and responsible innovation. Areas of Interest

- AI-enabled Modeling & Simulations: Using mathematical models, physical laws, and computational techniques to design sustainable business systems and smart automation.
- Blockchain, Cloud & Secure Architectures: Material-driven hardware advancements and cryptographic mathematics for scalable digital workplaces.
- Green & Circular Technologies: Chemistry and materials science innovations powering eco-friendly production, energy-efficient systems, and responsible resource cycles.
- Smart Environmental Monitoring: Physics-based IoT sensors for soil, water, and air quality; data-driven environmental sustainability.
- Engineering Applications & Digital Twins: Advanced engineering design, structural mechanics, and material behavior modeling to build automated, efficient smart systems.
- Sustainable Tourism Technologies: Sensor-rich AR/VR setups, environmental impact modeling, and green engineering for visitor management.

2. Mobile Systems, Data Science & Decision Intelligence

This track highlights the role of mathematics, computing, and engineering in real-time mobile technologies and predictive systems. Areas of Interest

- Big Data Analytics & Mathematical Optimization: Algorithms, statistical models, and quantitative forecasting for informed decision-making.
- Real-time Dashboards & Predictive Systems: Physics-based signal processing, data engineering, and mobile sensors enabling actionable intelligence.
- Mobile Finance & FinTech Engineering: Cryptographic mathematics, secure transaction architectures, and hardware-level innovations for digital payments, DeFi, and mobile banking.
- Entrepreneurship & Digital Innovation Ecosystems: Practical engineering solutions, prototype development, and material-driven product design for start-ups.
- Mobility in Learning & Ubiquitous Access: Human-centric mobile learning platforms using ergonomic engineering, cognitive science, and user-friendly technology design.

3. Digital Health, Learning Innovation & Quality Ecosystems

This track combines physical sciences and human-centered design to enhance education, healthcare, and institutional development.

Areas of Interest

- Digital Health & Telemedicine: Biomedical engineering, sensor physics, chemical biomarkers, and signal analytics for virtual clinics and remote diagnostics.
- Wearables & m-Health Systems: Materials science for flexible electronics, physics of biosensors, and data-driven health monitoring.
- Learning Technology Innovations: Engineering of virtual classrooms, adaptive learning algorithms, and scientifically grounded mobile learning tools.
- Gamification & Inclusive Education: Mathematical logic, human-factor engineering, and user-experience design supporting equity in education.
- Quality & Accreditation: Data-driven benchmarking, scientific measurement frameworks, and standardized evaluation systems for higher education.

Registration Fee Details

(Starts from 16th September 2025 to 25th November 2025)

Academicians/Research Scholars (India)—Online	INR 7,080/- per paper
Academicians/Research Scholars (India)—Offline	INR 12,000/- per paper
Academicians/Research Scholars (Foreign)	USD 250
Post Graduate Students (Online/Offline)	INR 4,720/- per paper
Industry Professionals/Scholars (India)	INR 17,700/- per paper
Industry Professionals/Scholars (Foreign)	USD 300

Registration Fees Includes

- Two Pre-Conference Workshops
- One-Day Workshop on Publication Process and Journey
(Copyrighted Course Approved by Government of India)
- Two Days' Access to All Sessions
- Presentation Certificate to all the Authors and Co-Authors
- Abstract Proceedings (ISBN)
- Lunch/Refreshments on Both Days of the Conference
- Turnitin Report
- Mentor/Guidance for Paper Drafting for Journals

Note: Publication charges (if any) are not Included in registration fees.
